

MIG/Flux Core Welder

AVANTech Incorporated, a rapidly growing technology company with extensive experience in design, fabrication and operation of water and wet waste treatment equipment for government and commercial clients, is searching for a **MIG/Flux Core Welder** at our **Columbia, SC**, manufacturing facility. Candidates must have a minimum of five (5) years' experience in MIG and carbon welding. Candidates must also be able to pass x-ray. Applicants must have the ability to read and interpret drawings, engineering sketches and blueprints and be able to follow design specifications. All applicants must be able to pass drug test.

This is a full-time position. Compensation is based on experience and skill. Paid vacations, paid holidays, and paid personal days are available to employees after they satisfactorily complete their 90-day introductory period. Medical, dental, life, short term disability and long term disability insurance are available to employees the first month after completing two full months of service. AVANTech also has a 401K retirement savings account.

A high level of safe working practices and procedures awareness necessary.

We are an Affirmative Action/Equal Opportunity Employer.
