AVANTech, Inc. Welcomes Robert A. Wilson as Senior Process Engineer at Richland, Washington Location

Columbia, SC – AVANTech, Inc., headquartered in Columbia, SC, welcomes Robert A. Wilson as Senior Process Engineer assigned to the Hanford Tank Side Cesium Removal (TSCR) Project and multiple AVANTech wastewater treatment projects. Rob will be working out of AVANTech’s newly acquired location in Richland, Washington, which was formerly Mid Columbia Engineering (MCE).

Rob brings over 20 years of experience in designing, integrating, and managing projects for the remediation and treatment of legacy nuclear waste at Savannah River, Rocky Flats, Fernald, and Hanford. Rob’s experience encompasses process/chemical engineering, federal, state, and local environmental regulatory compliance, and project management with emphasis in design, build, and commissioning/testing of unique technologies. Rob holds an MS degree in Environmental Systems Engineering and a BS in Chemical Engineering.

“Rob is our first new local hire in Richland, Washington. His extensive background in High Level Radioactive Tank Waste and exceptional reputation within the industry will be a tremendous asset to our team, particularly with regards to our work with the US DOE,” stated Jim Braun, President of AVANTech.

AVANTech is a comprehensive radioactive and industrial water treatment solutions provider. The company’s extensive experience in engineering process systems enables them to create integrated solutions that dramatically improve operations in industrial, government, commercial, and nuclear power applications. The combined company has a number of patented technologies and products.
